

The Inaugural ECE Entrepreneurial

Engineers Seminar Series:

“Starting your own Business”

**Bobby John
ECE 9T7**

**Wednesday, September 29, 5 p.m.
Mechanical Engineering, #102**

Bobby John started his first company, “Caught in the Web” in his basement, with a friend and an \$800 credit card limit, just after he finished a PEY term, before his 4th year of ECE. By the middle of his 4th year, the company’s revenue was almost one million dollars. That company was sold a few years later, and he has now created another successful company, “Creation Step.” He won the 1998 Business Development Bank of Canada’s Entrepreneur of the Year Award, and was featured in 1998 Report on Business Top 40 Under 40. Come and hear one of our own talk about why you should consider starting your own business.

Make your own future!
